

## **Clubs and Societies President Manifesto:**

### **Martha Bowsher**

#### **Experience:**

I am the co-captain of the women's football team at Fitz. I have been through the process of making detailed and thorough risk assessments, implementing COVID-19 guidelines and organising matches that have ensured everyone's safety. Understanding these processes means I already have an insight into the administrative side of the role. I will also have great sympathy for other captains and club presidents as they attempt to navigate the ever-changing measures they must take.

I have learned about how the funding, welfare policies and administrative bodies function at Fitz through attending a briefing for all captains and club presidents. I have attended Jake's detailed briefing of what the role demands. I understand what the role requires and want to put in the time and effort to support our clubs and societies.

I was part of the team that founded Fitz Horror Society last year. As communications officer, I worked hard organising and publicising our termly programme. Additionally, I helped manage the budget.

#### **Manifesto:**

Support during COVID-19 restrictions:

Getting outside, sharing common interests, or even seeing faces that do not belong to your household is so important for our mental and physical well-being. I will try my absolute hardest to keep clubs and societies in some capacity.

Involvement of all captains and presidents:

I want to continue to involve leaders in the overall running of clubs and societies. I will give a yearly briefing to explain how you can achieve funding, promote your group and where to ask for assistance. I would also strongly advocate for new societies and clubs through liaising with college staff and securing funding.

Welfare:

Recently, a welfare policy has been introduced for sports and societies at Fitz. I want to ensure that this is a key part of our ethos and clearly provide guidance to groups as well as independent support for all Fitz members.
